If you are like most Americans, the two greatest assets you have are the amount of equity in your home and the accumulation in your retirement and investment accounts.

The harsh reality is that Southern California home owners have now lost 20% or more of their home equity due to declining property values.

Add insult to injury, the American dollar is taking a pummeling, and the US Stock Market has clearly been suffering a major "correction" from which no one knows where it will turn around.

In addition, just about the time Baby Boomers are set to hit retirement in droves, there will be tremendous pressure to raise income tax levels to margins not seen since the 1970s in order to protect social security and to pay down the over 9 trillion in national debt.

For a short window of time, ***YOU CAN CASH IN ON HISTORICAL REAL ESTATE GAINS - WITHOUT SELLING YOUR HOME - KEEP YOUR EQUITY SAFE, LIQUID, AND EARNING A RATE OF RETURN - and SET UP A TAX FREE RETIREMENT PLAN!***
